TCI SAYS VOLUMES ARE BACK

Transport Corporation of India (TCI), which had to shelve capex plans last year owing to slowdown, is seeing growth in volumes. "Volumes have started coming back. It will not be fair to compare them with last September levels but the auto sector is picking up. Even components have shown a good rise, along with from certain consumer durables and telecom," executive director Vineet Agarwal said. But volumes haven't picked up in the real estate sector.
