

## Confer Industry Status To SC&L

“ The logistics sector critically needs an industry status and this is what we wish the sector gets in the year ahead. We expect a centralized toll mechanism to ensure uniformity in the toll charges paid by truck drivers at various check points; the development of the rail-freight corridor should be accelerated to give the much needed fillip to the rail freight sector. We wish that the Government as well as other logistics players give more attention to middle level infrastructures like warehouses, multi modal logistics parks, cold chain, cross docks, toll collection system, check posts etc.”
