

## **Transport Corporation of India good pick: Porinju Veliyath**

**Story:** Porinju Veliyath MD & Portfolio Manager at Equity Intelligence India is of the view that **Transport Corporation of India** is a good pick. In his interview with CNBC TV 18, he was quoted saying that, "Since last few months I have been talking about logistics and e-commerce, that sector has been in fancy, the stocks have move by some 3-4 times in the last one year. However in the last few months this has been stagnating. Remember **Transport Corporation of India** is the market leader in India and it is very well established with a national presence and with huge infrastructure and warehouses in place. GST is also now coming. So, it is going to be real event starting from April 2016."
